I am a solution-driven professional excelling in highly collaborative work environment, finding solutions to challenges and focused on customer satisfaction. Proven experience developing consumer-focused back and front-end solutions in JavaScript react (next js),node Js, express and mongo DB(MERN Stack)

I have experience building products for web app users, meeting highest standards for design, user experience, best practices, usability and speed. Responding to challenges by designing and developing solutions and building applications aligned to customer's services. Translating solutions into code and working across many different APIs, third-party integrations and databases.

I bring hands-on experience participating in and leading product design projects, including gathering user requirements, producing code, creating mockups and designing deployment, scale-up and load balancing architectures. I focus on creating clean, robust code with exceptional security and I am able to achieve compatibility targets while meeting and exceeding customer demands

CAREER OBJECTIVES

To lead and mentor a development team that will enable me utilize my potential optimally, exposed to all challenges that come with a software specialist position with exposure to system and network administration. I would also like to adapt emerging technologies in a working environment that would enable me achieve highest levels of productivity working as an individual and as part of a team while putting focus on organizational and career growth.

EDUCATION

DevC Training with Andela, Open Classroom and Facebook Developers circle.
2019 December – March 2021

Certificates attained

- Web programming with JavaScript.
- Build web apps with ReactJS
- Build Your First Web Pages With HTML and CSS.
- Build Your Web Projects With REST APIs
- Create Web Page Layouts With CSS.
- Go Full-Stack With Node.js, Express, and MongoDB.
- Learn Programming with JavaScript.
- Learn the Command Line in Terminal.
- Manage Your Code Project With Git & GitHub.
- Write JavaScript for the Web.

Egerton University
2016 - 2019
Diploma – Computer Science

Jomo Kenyatta University of Agriculture and Technology
Certificate in Mathematics
2013 - 2015

Kisumu Boys High School
2008 - 2012
KCSE - Mean Grade c+

WORK EXPERIENCE

ULA Africa -   Software Developer
- Design, develop and implement Front-end components for Ula Africa web application
- Optimize existing systems for efficiency
- Develop RESTful endpoints for existing backend functionality
- Collaborated with UI/UX designers to implement responsive web designs, ensuring accurate placement of design elements and maintaining visual consistency
- Implemented interactive features and animations to enhance user experience and engagement.

- o - Conducted thorough testing and debugging to identify and resolve issues, ensuring a smooth and bug-free user experience.
- o - Optimized code, images, and other assets to improve website performance and loading times.
- o - Worked closely with the back-end development team to integrate front-end components with server-side logic.
- o - Ensured cross-browser compatibility by addressing browser-specific issues and testing on various browsers and devices.

Shantec Systems Limited- Web developer
- o Planning and delivering software platforms used across multiple products and organizational units.
- o Writing well designed, testable, efficient code by using best software development practices.
- o Creating website layout/user interfaces by using standard HTML/CSS practices.
- o Integrating data from various back-end services and databases.
- o Researching different software programs, maintaining software documentation.
- o Implementing contingency plans in case the website goes down.
- o Maintaining and expanding/enhancing the website once built.
- o Managing a team of developers.

Mawimbi Sea Food Restaurant - IT MANAGER

- o Running regular checks on network and data security
- o Identifying and acting on opportunities to improve and update software and systems
- o Developing and implementing IT policy and best practice guides for the organization
- o Conducting regular system audits
- o Overseeing and determining timeframes for major IT projects including system updates, upgrades, migrations and outages
- o Identifying opportunities for team training and skills advancement
